Praise for the Handbook:

"The Handbook is a valuable reference book for anyone professionally involved with Aboriginal languages in Australia, and essential for those in NSW. It brings together details about, and references to, all the available published information on NSW languages. It succinctly documents the current knowledge about the languages spoken in each area of the state and guides the reader looking for more detail with bibliographic information. I never go anywhere without it!" Dr Mari Rhydwen, Aboriginal Languages Consultant, NSW Department of Education and Training.

"For students of language endangerment, this comprehensive new book fills a pressing need. This is the first handbook of Australian languages to take an entire state as its scope. The great strength of this book is its diachronic scope, bringing together sources ranging over two centuries." Christopher Moseley OGMIOS Newsletter for the Foundation of Endangered Languages, United Kingdom.

Murrumbidgee Aboriginal Language and Culture Co-operative publishes quality dictionaries, grammars and language learning materials on the languages of NSW, particularly the north-eastern region.
